

One room. Two finished views.

Interior visualization / paid pilot

FIXED PILOT FEE

USD 900

50% to start: \$450

50% before final handover: \$450

01 / Included scope

One interior room up to 35 m², developed from supplied dimensioned plans and an approved design direction. Two approved camera views; materials, lighting and styling based on the supplied brief. One scene and one design direction.

02 / Deliverables

Two final JPG or PNG images at 3840 pixels on the long edge, in the agreed aspect ratio. Two consolidated revision rounds. Final scene file and used assets included where transferable; non-transferable third-party assets are identified before starting.

03 / Production target

Seven working days of production after receipt of the deposit, complete source files and written scope approval. Client review time is additional. The start date is confirmed against team availability.

Proposed fee valid through 30 September 2026, subject to file review and written scope confirmation. Any applicable taxes, withholding treatment and transfer charges must be stated in the final quotation before acceptance.

A controlled delivery process.

Before Day 1 / Confirm the brief

Receive plans, dimensions, references, furniture/material selections, camera requirements and source-file version. Resolve missing information before confirming the schedule.

Days 1-2 / Approve the scene

Develop the scene and issue camera/clay previews. Confirm the two views and key geometry.

Days 3-4 / Review direction

Issue material and lighting previews. Apply revision round 1 from one consolidated feedback list.

Days 5-6 / Refine

Issue refined previews. Apply revision round 2 within the approved design direction.

Day 7 / Check and hand over

Check resolution, materials, camera consistency and file completeness. Release unwatermarked final outputs and transferable source files after the balance is received.

Review gates pause production until feedback is received. Late feedback, new design directions or missing inputs may move the delivery date. Any effect on price or schedule is agreed before additional work.

Responsibilities & next steps.

Client inputs

Supply reliable dimensions, a plan/DWG or usable model, an approved concept, material and furniture references, and one authorized feedback contact. Confirm your right to share all supplied files and assets.

Scope boundaries

The pilot excludes full interior design, technical drawing sets, engineering, site verification, code compliance, procurement, extra rooms/views and complex bespoke asset modeling. Light Up will flag any such work during file review and quote it separately.

Revisions and quality

A revision round is one consolidated list within the approved scope. New layouts, replacement concepts or additional cameras require a separate estimate. Corrections to Light Up errors against the agreed brief do not consume a revision round.

Confidentiality and file use

Agree an NDA when required before transferring confidential files. Work is intended for white-label delivery. Portfolio publication requires written permission. Confirm deliverable usage rights and any third-party asset restrictions in the final agreement.

Ready to proceed?

Send the project brief and source files to your Light Up contact. We confirm fit, availability and the final written scope before issuing the deposit invoice. Monthly production capacity is quoted separately after the pilot review.

Commercial proposal only. Scope, final terms and fees become effective upon written agreement.
